The Company's management has recast the Financials

statement in the form required by Division I of Schedule III of the Companies Act, 2013 for the purpose of interim financial statement.

- The interim financials statements are prepared and presented under the historical cost convention and evaluated on a going concern basis using accrual system of accounting in accordance with the generally accepted accounting principal in India (GAAP) and the requirements of the companies Act, Including the accounting standards (AS 25) prescribed by section 133 of companies Act 2013 read with rule 7 of company's (Accounts) rules, 2014.
- Items included in the Consolidated interim Financial Statements of the group are measured using the currency of the primary economic environment in which the entity operates ("the functional currency") The Indian Rupee (INR) is the functional and presentation currency of the group. The Financial Statements are mentioned in Lakhs unless otherwise stated in the relevant notes or schedules of the Financial Statements.

## **BASIS OF CONSOLIDATION**

The interim Consolidated financial statements comprise the financial statements of the Company and its subsidiaries (referred to as "Group" as at 30<sup>th</sup> Sept, 2025, 31<sup>st</sup> March, 2025). Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and can affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- i. Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee).
- ii. Exposure, or rights, to variable returns from its involvement with the investee; and
- iii. The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee.

The Group re-assesses whether it controls an investee, if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary and associates begins when the group obtains control over the subsidiary and associates, and ceases when the Group loses control of the subsidiary and associates. Assets, liabilities, income and expenses of a subsidiary and associates acquired or disposed of during the year are included in the interim consolidated financial statements from the date the group gains control until the date the group ceases to control the subsidiary and associates.

interim consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the group uses accounting policies other than those adopted in the interim

consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that group member's financial statements in preparing the interim consolidated financial statements to ensure conformity with the group's accounting policies.

#### PROCEDURE FOR CONSOLIDATION:

- Combine similar items of assets, liabilities, equity, income, expenses, and cash flows of the parent with those of its subsidiaries and associates.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary and associates.
- Eliminate in full intragroup assets and liabilities, equity, income, expenses, and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised are eliminated in full).

The difference between the cost of investment in the subsidiary and associate and the Company's share of net assets at the time of acquisition of share/ownership in the subsidiaries and associates is recognised in the financial statement as Goodwill or Capital Reserve as the case may be.

Minority Interest in the net assets of interim consolidated subsidiaries and associates is identified and presented in the interim consolidated Balance Sheet separately from liabilities and equity of the Company's shareholders.

Minority Interest in the net assets of interim consolidated subsidiary and associate consists of the amount of equity attributable to Non-Controlling Interest (NCI) at the date on which investment in a subsidiary and associate is made and the share of movements in equity since the date parent subsidiary and associate relationship came into existence.

Actuarial gains or losses arising from experience adjustments and changes in actuarial assumptions are credited or charged to Statement of Profit and Loss in the period in which such gains or losses arise.

- **Leave Salary**

The Group has a policy to pay off the excess unavailed leaves within the year itself.

## BORROWING COSTS (AS: 16)

Borrowing costs that are attributable to the acquisition or construction of a qualifying assets are capitalized as part of the cost of assets. A qualifying asset is one that necessary takes substantial period of time to get ready for its intended use.

Basis of Capitalization is the weighted average of the period's general purpose outstanding borrowing costs. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

## SEGMENT REPORTING (AS:17)

The Group is in Manufacturing of all types of Moulds for the use in injection moldings as well as into manufacturing of kitchen appliances which are both considered as the reportable segments. The Group's operations are based in India. There are no reportable geographical segments.

## RELATED PARTY TRANSACTION (AS: 18)

Disclosure of transactions with related parties, as required by Accounting Standard 18 "Related Party Disclosure" has been set out in a Notes to the interim Financial Statement. Related parties as defined under clause 3 of the Accounting Standard have been identified based on representations made by key managerial personnel and information available with the Group.

### **LEASES (AS: 19)**

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

A lease is classified at the inception date as a finance lease or an operating lease.

Lease arrangements where the Group has substantially all the risks and rewards of ownership associated with the leased assets are classified as finance leases. Assets taken on finance lease are recognized as fixed assets. An equivalent liability is created at the inception of the lease. Rentals paid are apportioned between finance charge and principal based on the implicit rate of return in the contract. The finance charge is shown as interest expense, and the principal amount is reduced from the liability. The assets acquired under the lease are depreciated over the lease term, which is reflective of the useful life of the leased asset.

Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term unless other systematic basis is more representative of the time pattern of the benefit.

### **EARNINGS PER SHARE (AS:20)**

The Group reports basic and diluted Earnings Per Share ("EPS") in accordance with Accounting Standard 20 on Earnings per Share. Basic EPS is computed by dividing the Net Profit or Loss for the year by weighted average number of equity shares outstanding during the year. Diluted EPS is computed by dividing the net profit or loss for the year by the weighted average number of equity shares, except where the results are anti-dilutive. As per AS 20, the effect of Split and Bonus issue of shares is given to the very first reportable period in the interim consolidated financial statements.

### **TAX EXPENSE (AS:22)**

Tax expense comprises both current and deferred taxes. The current charge for income taxes is calculated in accordance with the relevant tax regulations. Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the Balance Sheet date.

Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets are recognized on carry forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such deferred tax assets can be realized against future taxable profits.

Unrecognized deferred tax assets of earlier years are re-assessed and recognized to the extent that it has become reasonably certain that future taxable income will be available against which such deferred tax assets can be realized. Deferred tax asset in respect of carry forward of unused tax credits and unused tax losses are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

## PROVISIONS AND CONTINGENCIES (AS:29)

The Group recognizes provisions when a present obligation (legal or constructive) as a result of a past event exists and it is probable that an outflow of resources embodying economic benefits will be required to settle such obligation and the amount of such obligation can be reliably estimated.

A disclosure of contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

### **Material Regrouping: -**

Appropriate regrouping has been made in interim summary statements, wherever required by a reclassification of the corresponding items of income, expenses, assets, liabilities and cash flows in order to bring them in line with the groupings as per audited consolidated interim financial statement of the Group, prepared in accordance with schedule III and the requirements of the securities and exchange board of India (ICDR) Regulation 2018 (as amended).
